

Homework

Required to complete your homework!

- Document your decisions

- o Select fonts, icons, images, color scheme

Font: For my font I am going with Helvetics. I like this font, it is clean and one we use at work. It is a web-safe font, easy to view and will not negatively affect my website performance.

Icons: For I will probably need some arrows to help users know where to enter data in fields. I will also have your standard social media icons to link to my professional profile. I prefer icons that are a circle with a single image inside. The colors of icons will vary. The color of the icon and circle will help it be visible under may display brightness levels.

Images

Color Scheme: colors for my site will keep in mind that people are color blind as well as the effect of colors on my sites performance. The background will remain white (#FFFFFF). With any bold font in a dark websafe contrasting blue (#000066) and regular font in black (#000000). The Header banner or navigation bar I am thinking will be the same dark blue (#000066) with White front (FFFFFF). I will use images and my site banner to give my site a pop of color and design.

- Define your Time line

- Create your Kanban board

Done

- o Create Stories

- Create task list for story

- Estimate effort (in hours)
